

# Training Level: **Advanced**

---

## **Phases/Progression of Training**

- BUILD phase (1/25/21 – 2/14/21)
    - Getting miles under legs, progressively increasing volume and intensity, and just generally getting into shape.
    - Distance indoor track training/workouts with a slight focus for half-marathon
    - **50-60 miles/week**
  - STEP-DOWN week of training (2/15/21 – 2/21/21)
    - so that indoor track racers can taper for the last indoor meet of the season (Illinois Club Relays)
    - and so that all others (non-track racers) can have a chance to rest up their legs a bit
    - **40-50 miles in the week**
    - Cross-training still encouraged here
  - PEAK phase (2/22/21 - 3/21/21)
    - Rotation of half marathon-specific workouts:
      - Tempo runs, progression runs, threshold intervals, distance track intervals
    - long runs of at least 12 miles (challenging yourself a bit on these and some miles at race pace)
    - consistently higher mileage (**60-75 miles/week**)
  - TAPER phase (3/22/21 – 4/4/21)
    - Mileage and intensity drop back
    - **40-50 miles/week**
    - If interested in racing during outdoor track, this is when these meets begin
-
